DETAILED ACTION

Claims 1-16 are pending.

Raw Sequence Listing have been entered.

Submitted Information Disclosure Statement (I.D.S) is noted.

Priority

An application in which the benefits of an earlier application are desired must contain a specific reference to the earlier filed application(s) in the first sentence of the specification (37 CFR 1.78). This statement should be **updated** as to reflect the latest status of the priority application. Still further, the information provided in the amendment filed on November 13, 2003 is in error. According to Office's record priority Application no. 09/890,650 is March 3, 2002. Amendment filed on 11/13/03, however, indicates the priority date to be August 3, 2000. Please reconcile.

Subject Matter Free over Prior art

Claims 1-16 are deemed free of prior art, given failure of the prior art to teach or reasonably suggest the SEQ ID NOs: 4-6, and 25 as a short polypeptides capable of inducing immune response. The closest arts identified are Partidos et al (J. Gen. Virology, 1990), and Barrett et al (Virus Research, 1987). The prior art, however, fails to teach the now claimed polypeptide and there was no motivation to isolate the specific proteins now claimed from the canine distemper virus.

Claims 1-16 are allowed.
